REPLY TO FINAL OFFICE ACTION

Sir:

In response to the Final Office Action of November 28, 2003 in the above-referenced application, the Applicant submits the following remarks.

REMARKS

Claims 120-128 have been rejected under 35 U.S.C. §103(a) as being unpatentable over U.S. Patent No. 6,085,169 to Walker, et al. ("Walker") in view of an article entitled "Air Charters Fly To Internet" by David Jonas ("Jonas"). Applicant respectfully traverses this rejection.

Claim 120 recites a reservation system for private aircraft, in which an individual passenger reservation bid is accepted and the "flight availability" of a private aircraft is reserved, if the reservation system "has matched a number of reservation bids with said flight availability such that [a] minimum total payment requirement is met." The Examiner asserts that *Walker* teaches this limitation. Office Action at 2 (citing *Walker* at column 6, lines 23-30). Applicant respectfully disagrees. While *Walker* appears to describe a technique whereby commercial airlines may submit conditional purchase offer (CPO) rules, *Walker's* aircraft always fly the route specified by the commercial airline. *Walker* fails to show that aircraft are reserved to fly only when a "minimum total payment requirement is met," based on the reservation system having matched a sufficient number of individual reservation bids to the aircraft owner's specified flight
